O Things to think about for multi-year budgets:

- How many years do you want to apply for funding for? Typically, Foundation North can consider requests for up to 3 years of funding.
- How will your costs change over three years? For example, pay rises, increases in rent and other costs.
- What other projects might you want to do in 3 years' time? If you are successful with a multi-year grant, you cannot come back to Foundation North for another grant until this one is finished.

- You might need to estimate year 2 and year 3 amounts based on what you know for year 1.
- Not all costs need to happen every year. For example, a strategy wānanga may only happen every 2nd year.
- It's ok to estimate increases in income from things like fundraising campaigns, but we might ask for your work plan to achieve these increases.

Foundation North will fund operating costs up to 30% of your last year's total expenses for each year.

For example, if you spent \$250,000 last year, you can apply for up to \$75,000 each year towards these costs.
